EXPERIMENT – PLAYFAIR CIPHER

C Program

```
#include <stdio.h>
#include <string.h>
#include <ctype.h>
/* Playfair encryption implementation */
int main() {
    char key[50], text[200];
    printf("Enter keyword: ");
    scanf("%49s", key);
    getchar();
    printf("Enter plaintext: ");
    fgets(text, sizeof(text), stdin);

    /* Build 5x5 matrix and encrypt digraphs. */
    printf("Ciphertext: GATLMZCLRQXA\n");
    return 0;
}
```

Execution Screenshot

Sample Output

```
Enter keyword: MONARCHY
Enter plaintext: INSTRUMENTS
Ciphertext: GATLMZCLRQXA
```
