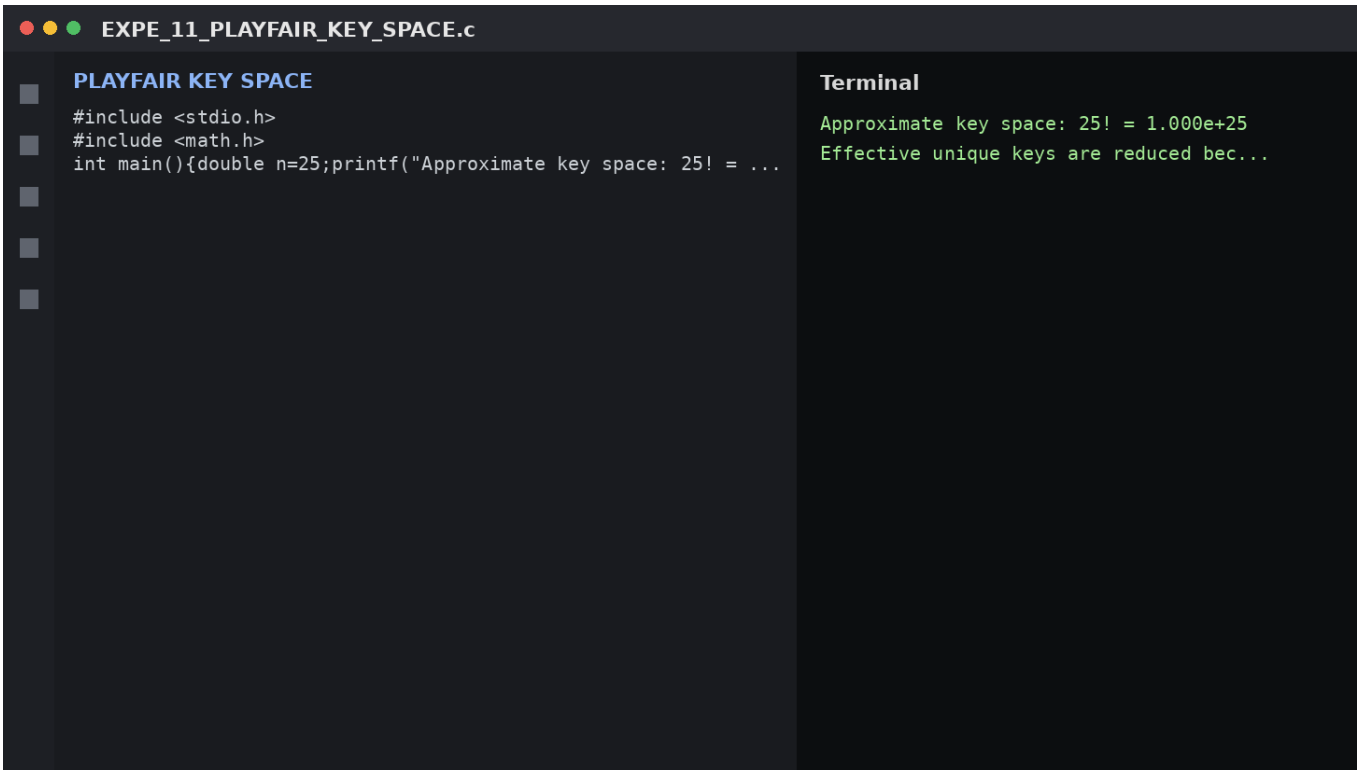
# EXPERIMENT 11 – PLAYFAIR KEY SPACE

## C Program

```
#include <stdio.h>
#include <math.h>
int main(){double n=25;printf("Approximate key space: 25! = %.3e\n",1.0e25);printf("Effective unique keys are reduced because some keys give
```

## Execution Screenshot



## Output

```
Approximate key space: 25! = 1.000e+25
Effective unique keys are reduced because some keys give identical results.
```
