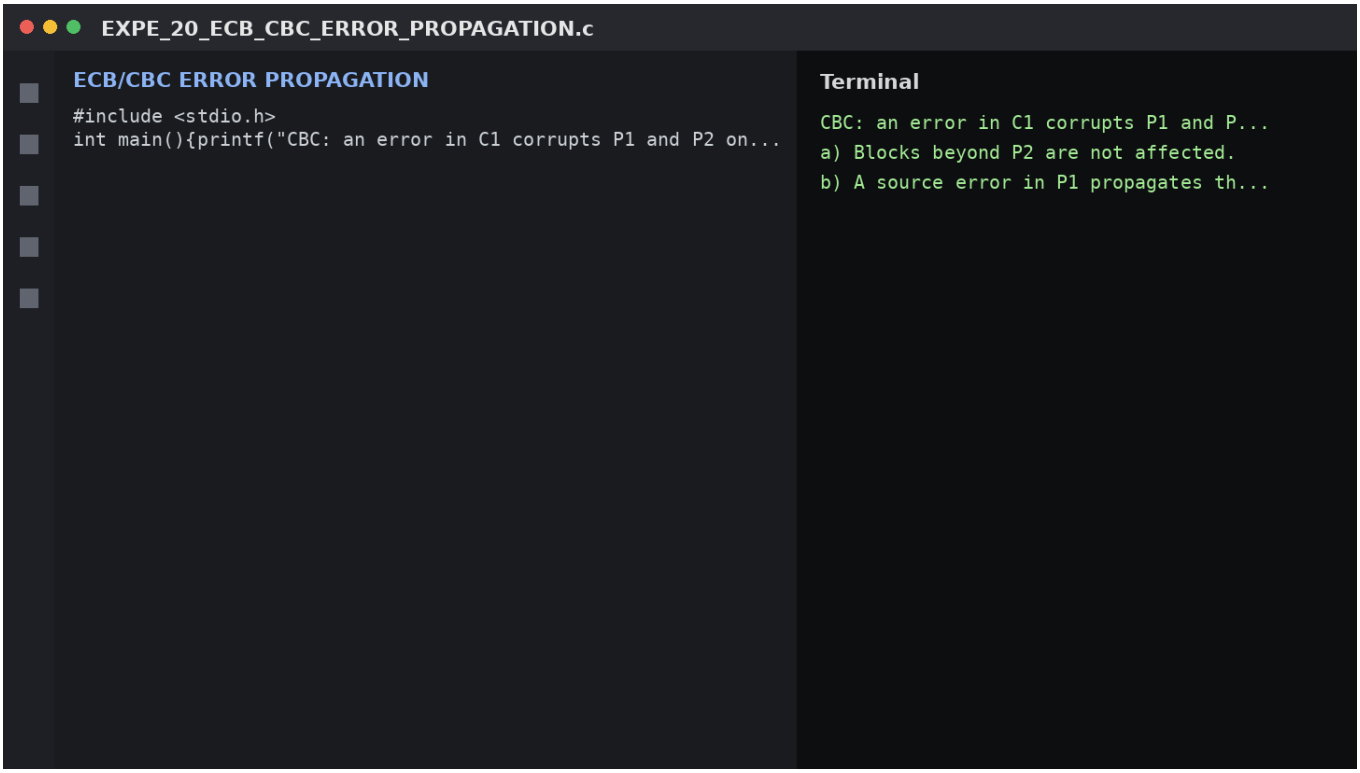
EXPERIMENT 20 – ECB/CBC ERROR PROPAGATION

C Program

```
#include <stdio.h>
int main(){printf("CBC: an error in C1 corrupts P1 and P2 only.\n");printf("a) Blocks beyond P2 are not affected.\n");printf("b) A source er
```

Execution Screenshot



Output

```
CBC: an error in C1 corrupts P1 and P2 only.
a) Blocks beyond P2 are not affected.
b) A source error in P1 propagates through subsequent CBC encryption blocks.
```
