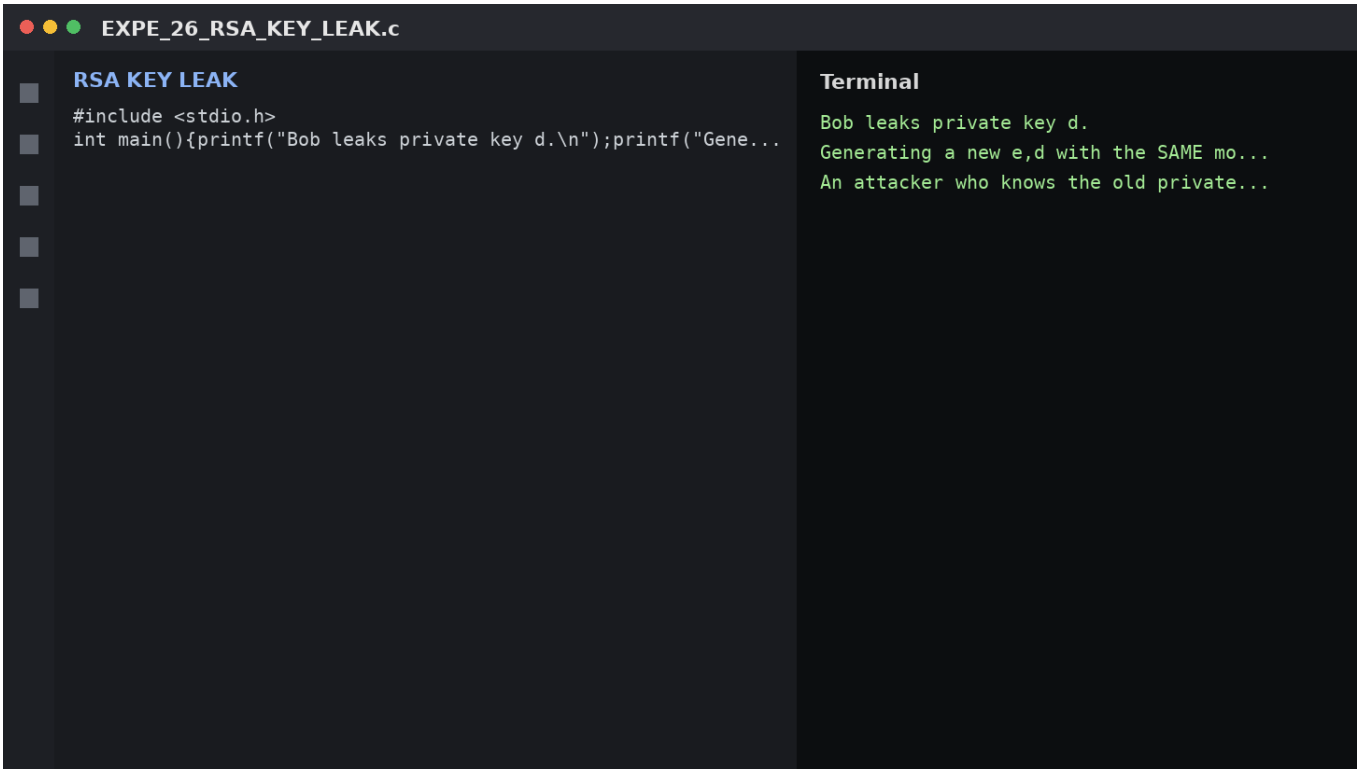
EXPERIMENT 26 – RSA KEY LEAK

C Program

```
#include <stdio.h>
int main(){printf("Bob leaks private key d.\n");printf("Generating a new e,d with the SAME modulus n is unsafe.\n");printf("An attacker who
```

Execution Screenshot



Output

```
Bob leaks private key d.
Generating a new e,d with the SAME modulus n is unsafe.
An attacker who knows the old private key may still exploit the modulus.
```
